

NATURAL RATTAN

Rattan is a natural material and is made from thick grass and palm species. Because the material is completely natural and all furniture is made by hand, each piece of furniture becomes unique. Differences in color and appearance can occur depending on the season when the rattan is harvested, and the furniture is manufactured.

Our rattan products are made from different types of rattan, all of which come from plantations in Indonesia. The rattan is usually kubu, slimit, abaca, croco, lacak and malaka. The surface is sometimes treated with water-based varnish. Recommended for indoor use. Rattan becomes dry and brittle over time and can be easily broken under load or pressure. The material should therefore be moistened with the help of a flower sprayer, for example, at regular intervals. Clean with a damp cloth and a soft brush.

CUSHIONS FOR WICKER FURNITURE

As standard, we offer 100% cotton cushions in off-white, for our rattan furniture. The core of the cushions consists of polyether and is wrapped with finely cut polyether and synthetic fibres.
