

SOLID OAK

Oak is a hard, dense and strong type of wood that is excellent for furniture manufacturing. All our furniture is made of oak from Europe. Recommended for indoor use.

The products in the colours Pebbles grey, Carbon, Silverback, Black Oak and US Brown are made of completely solid oak and have been treated and painted by hand. On the surface is a colourless wax. The surface is smooth and natural branches and cracks have been left visible. This makes the furniture unique and no two are alike.

Reclaimed Oak, is completely recycled oak that comes from old houses and buildings in Europe. The wood is aged and the traces of heat, cold, rain and wind are clear. On the surface is a colorless wax.

The oak in the Denver- and Vermont collection, “weathered oak”, consists of solid oak and oak veneer and is treated with wax

MAINTENANCE

Remember that the surfaces are sensitive to strong cleaning agents and use underlays under glass, cups, vases etc. Wipe gently with a slightly damp cloth. Vacuum cleaner with soft furniture nozzle is suitable for the natural cracks.

The furniture should be treated with uncolored furniture wax, which protects against stains. We recommend “Protect Spraywax”. Art No. 97-10002
